

303 Desk Station

A desk master station with a 16 digit alphanumeric display. Available in two versions with an open microphone or with a gooseneck microphone and a choice of colour anthracite or grey. It's primarily used for desk to desk intercom or as a master station for door control, access etc. Call requests are queued until accepted and are identified by name if programmed. Optionally the station can be wall mounted.

Main features:

- 16 character alphanumeric display
- Built-in microphone
- 0.5W Speaker
- Adjustable speaker volume
- In call LED
- Visual and audio call signalling
- Power supply from central
